

RAC-R Education Committee Notes

September 12, 2007

- Meeting called to order by Max Nguyen.
- Max informed attendees of the meeting that he will be developing an Education Committee link to add to the RAC-R website. Under the link, participants will be able to view the objectives, handouts, and course registration forms for the Emergency Airway Management Course that the RAC has developed.
- Max informed the attendees that the following organizations have shown interest in hosting an EAMC at their education facility and in which month.

October 2007 – Christus St. Elizabeth

November 2007 – Lake Jackson EMS

December 2007 – Mont Belvieu (13 chairs left)

January 2008 – The Medical Center of SETX

- Follow-up from previous meeting – Galveston EMS requested forms for airway data collection and intubation tracking. Max presented the committee with (2) forms that can be utilized in regards to this type of collection and tracking. Once the education link is up and running, the forms will be posted on the link and each EMS agency will be responsible for completing these forms and submitting to the patient destination facility for tracking purposes.
- Max and Jon will get together over the next two weeks and develop a tracking form for the challenge that the Hospital Committee presented to the Pre-Hospital Committee in regards to determining what complications are arising during intubations and how to address the complications.
- Follow-up from previous meeting in regards to the request for Stroke Prevention and Data collection. This project has been tabled until further notice to allow for the committee to complete the education process and establish a solid forum for the EAM Course.

Meeting adjourned.
