

# Emergency Airway Management Course

## OBJECTIVES

### Part I - The Essential Basic Airway

- Introduction to Emergency Airway Management
- The Goals of Airway Management
- Revisit Anatomy & Physiology of the Airway
- Early Recognition for Emergency Airway Management
- Effective Basic Airway Management
- Emergency Airway Management Algorithm

### Part II - The Difficult Airway

- Airway & Physiology of the Airway
- The Difficult Airway
- Predicting & Recognition of Difficult Airway
- Management of the Difficult Airway
- Advanced and Back-up Airway Management
- Emergency Airway Management Algorithm

### Part III - Rapid Sequence Induction Intubation

- Introduction to Rapid Sequence Induction (RSI)
- Recognizing the need for RSI
- Pharmacology of RSI
- Confirmation of Tube Placement
  - Clinical Presentation
  - End-tidal CO<sub>2</sub> Detector
  - Capnography
- Cricothyroidotomy
- Emergency Airway Management Algorithm
